ABOUT ME

I am a Software Engineering student at the National Textile University, Faisalabad. During my studies, I have learned various skills and developed several projects through both coursework and self-learning. Currently, I am diving into the field of Data Science. Over the past four months, I have been learning about it and have built several prediction models using different machine learning techniques. I have also shared some of these projects on LinkedIn and received a good response.

WORK EXPERIENCE

EXPERIENCE

- I recently completed a one-month internship at **Excelerate** as a Data Analyst, where I also worked as a Project Manager within the team
- **NavBo**t is a smart navigation system with an AI chatbot, developed as a semester project at NTU. It addresses a real-world problem and integrates various technologies
- I developed a VS Code extension called **AutoPath**, which was based on a real problem that I solved using this solution.
- I have developed several prediction projects using different machine learning models.

Current Goal

"I aim to showcase my skills to professionals and gain practical experience through an internship. While I have developed several projects, I believe working with professionals will further refine my abilities and provide valuable learning opportunities.
